

ALPHA PROBE & BRUSH

A dual bend manipulator with probe & brush holder

Pushing boundaries of remote inspection and intervention

Be Confident

The Reach Alpha Probe and Brush is a dual-function manipulator built to conduct remote inspection and maintenance activities in harsh, subsea environments. Capable of cleaning away sediment and organic build-up on a surface, as well as collecting accurate data determining corrosion levels, the Alpha Probe and Brush unit is reducing risk and cost factors associated with inspection requirements in Oil and Gas industries.

• ELECTRICAL

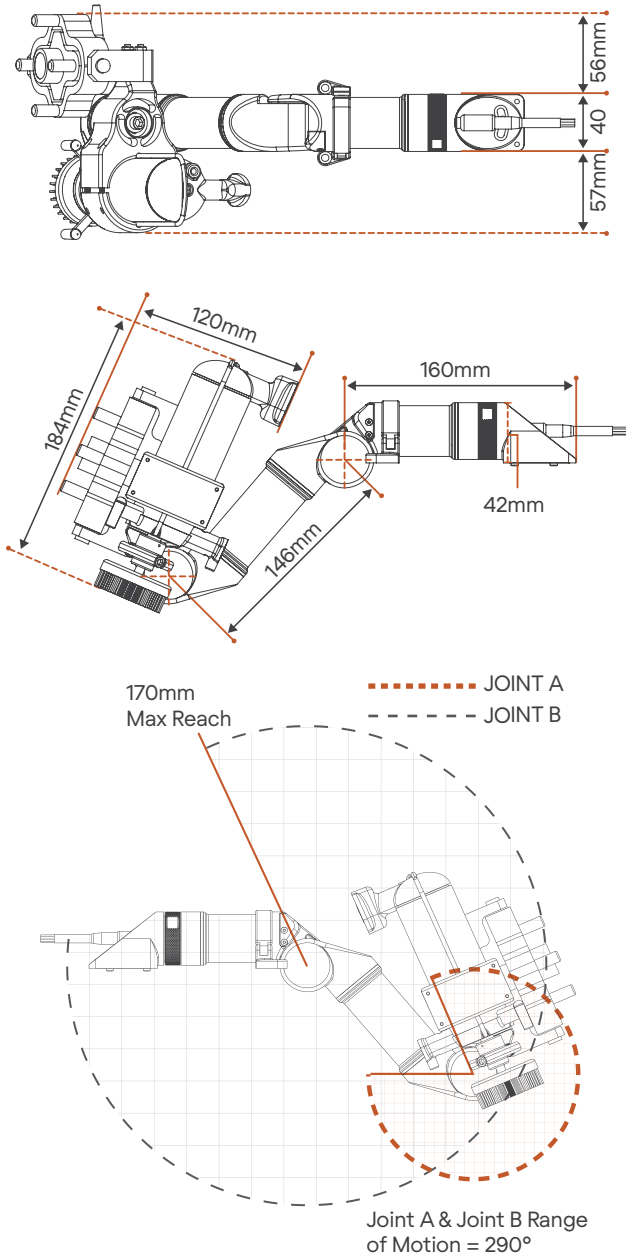

Voltage	18-30V
Wattage	35W Max
COMS	RS232/RS485

• ENVIRONMENTAL

Depth	300M
Temp	-35°C to 35°C
Material	AL6061

• MECHANICAL

Weight (air)	1200g
Weight (water)	795g

A Revolution for Subsea Inspection & Intervention
