

Mission Specific Tooling

These tooling options enable operators to quickly configure their grabber or manipulator for the required task. Effortless conversion from one end-effector to another offers a flexible solution to complex missions.

◀ Interlocking Quad Jaws

RB-1041

Dependable and durable, the standard jaws are the go-to for small access areas and where extra reach is required.

- Length: 105mm (Pivot point to end)
- Max Opening: 135mm (tip to tip)
- Serrated inner for secure grip
- Available in Stainless Steel 316

◀ Wide Quad Jaws

RB-1025

The sturdy four prongs of the Quad Jaws provide increased support and grabbing surface area.

- Length: 100mm
- Max Opening: 180mm
- Wide, supportive grip for additional stability

◀ Parallel Jaws

RB-1034

Continuously parallel plates give a predictable and consistent grip, making the Parallel Jaws the benchmark tool for tasks such as valve actuation.

- Length: 100mm
- Max Opening: 80mm
- 85x50mm jaw plates

Adaptable Tooling for your Specific Tasks

Be bold, knowing you have interchangeability at hand.
